Bluetooth

Switch on headphone, Bluetooth works spontaneously, searching previous pairing Bluetooth set. Bluetooth name for music function is AA-2093. If the headphone fails to connect, it starts pairing other Bluetooth devices. In this case, turn on your Bluetooth device to search headphone. PIN code is "0000". Music streams after pairing successfully. When headphone is connected with mobile phone, if there is incoming call, short press **▶||** to receive and end calls.

Bluetooth selfie

Press long **▶||** to transfer to Bluetooth selfie function. Turn on Bluetooth of mobile phone or other Bluetooth enabled devices and try to connect. Bluetooth name for selfie function is "shutter". Turn on camera of mobile phone or other Bluetooth enabled devices after completing pairing, press shortly "BACK" or "FORTH" button to activate self timer. (Note: Self timer supports most Android or IOS mobile phones. Self timer controller button differs from phone to phone, some are controlled by "BACK" while others by "FORTH". Some phones cannot activate self timer due to camera protocols that may not be compatible.

TF Card

Under any mode, plug TF card into TF card connector to enjoy music from TF card.

FM radio

Long press **▶||** to transfer to FM radio mode. Under FM radio mode, press shortly **▶||**, headphone searches available stations. It stores stations after pre-playing. Blue LED light doesn't stop blinking until search ends.

Card Reader

Under any mode, plug one end of USB data cable into the micro USB connector of headphone and the other end into USB connector of PC. User can browse or edit documents on TF card. It supports WINDOWS XP/WIN7 system. Card reader connector: USB2.0.

Charging

Plug the charging cable into Micro USB slot of headphone, USB slot of PC or other USB slot of chargers to get charged. When the headphone is being charged, the indicator light turns red. Once it is fully charged, the indicator light turns off.
