# User Manual

---

The Volume Control is designed for wall mounting and will fit all standard Australian electrical junction boxes (surface or recessed). It has a power rating of 60 watts RMS which will suit most applications except those where very high power is required. The Volume Control has been built to the highest of standards ensuring quality electronic components and correct performance. The Volume Control has several unique advantages. When at full volume the Volume Control is not circuit. When at OFF position the Volume Control is open circuit (there is no load on the amplifier). With an amplifier output of 60 watts RMS the Volume Control will not dissipate any noticeable heat on any level setting.

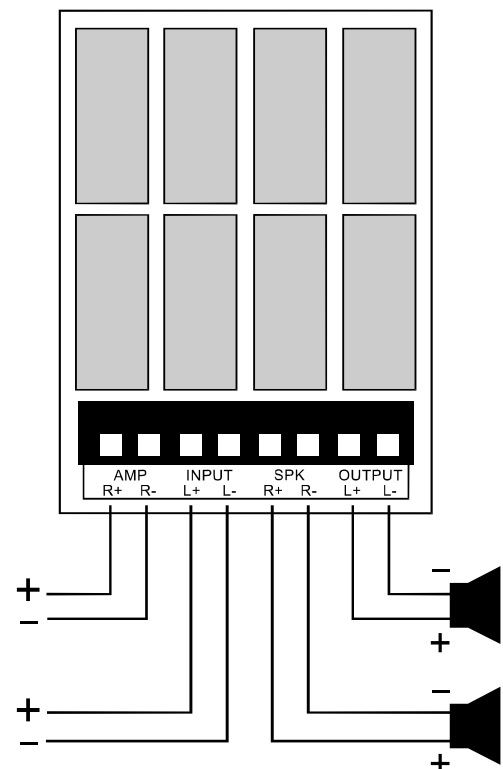

## SPECIFICATIONS:

Speaker Power Rating: 60WRMS, 20Hz – 20kHz  
Speaker Impedance: 4, 8, or 16Ω Speakers  
Switch: 0dB (straight through), -6dB, -12dB, -18dB, -24dB, Off (no connect)  
Mounting: Standard electrical wall plate  
Weight: 109g  
Dimensions: 115(W) x 74(H) x 50(D)mm

**TIPS:** The Volume Control does not replace the need for impedance matching in multiple speaker installations. Long cable runs can seriously affect sound quality.

Make sure good quality cable is used to maintain sound quality.
