NEXTECH

Smart Padlock
LA5140
User Manual

Overview

The Bluetooth Biometric Padlock (BB-Padlock) is both secure and convenient. You can unlock it using your Bluetooth secure mobile phone app or simply by touching the Biometric fingerprint sensor located on the device.

You can configure your BB-Padlock via the Keybox mobile App. This App is free of charge and can be download from the Google Play store, or by simply scanning the QR code below using your smart phone.

Scan QR code to download APP

Once you have successfully downloaded and installed the Keybox App on your smart phone, simply follow this guide to personalise your lock and register authorised persons who will be able to access your lock.

Operation

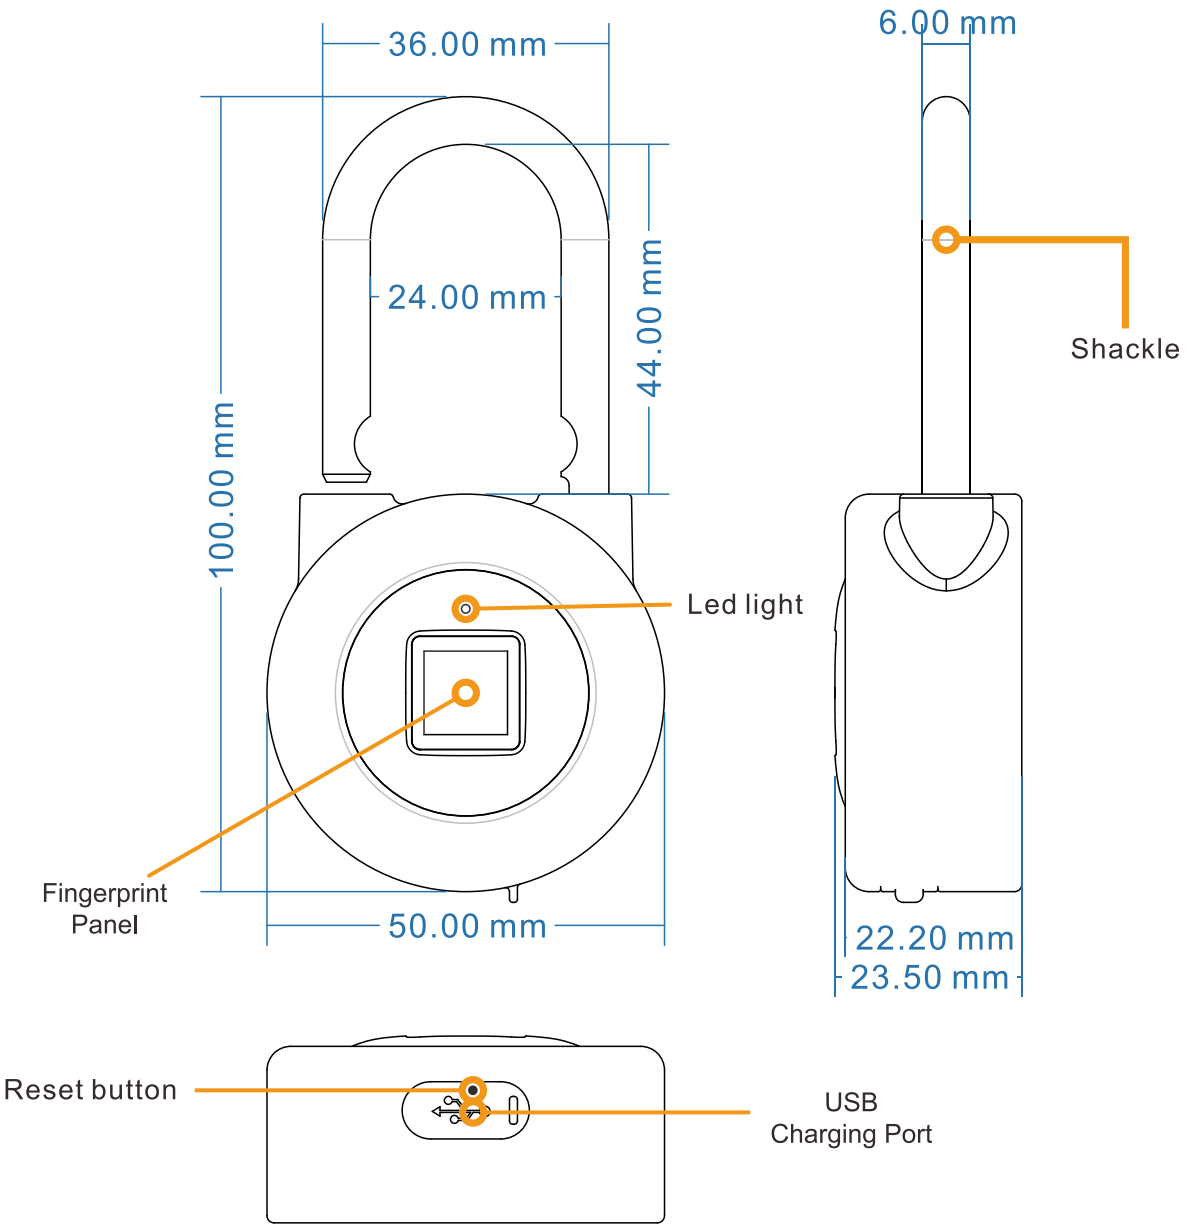
• Before use ensure the unit is fully charged. Plug the unit into a 5V USB base charger (using the provided micro-USB charging cable). Allow at least 90 minutes for the unit to be fully charged.

Red light flashing: Indicates the unit is charging
Blue light flashing: indicates the unit is fully charged

• Keep the Biometric fingerprint scanner surface dry at all times. As water droplets, and high moisture on the Biometric sensor surface will cause the Biometric sensor circuit to rapidly drain battery power.

• If during normal operation the Biometric sensor is not accurately detecting a valid fingerprint authentication request, use the Keybox mobile App to verify or re-register the user fingerprint.

Product introducton



Note: Reset Button
(When device fails to work, please press the reset button to reset the Padlock
