

ECO SOLAR equipment upgrade process

1. Entering the APP, click Cloud

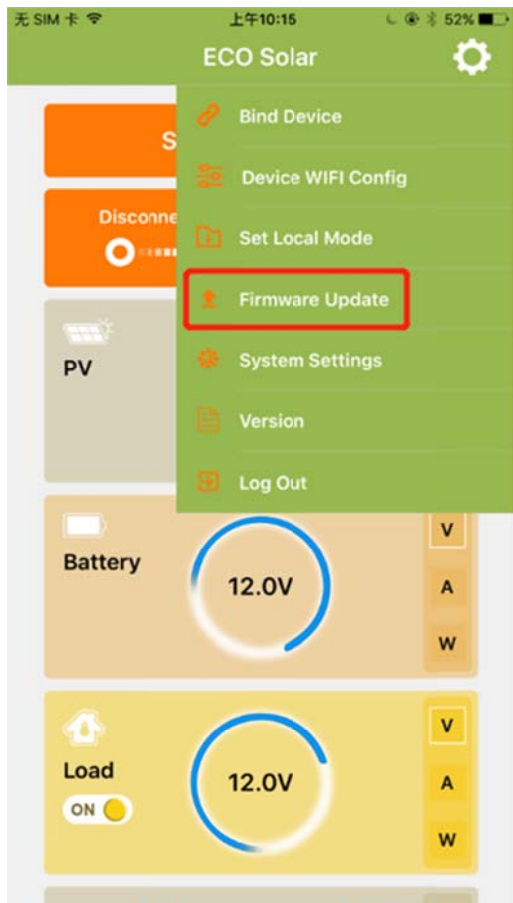

2. Login the corresponding account to enter the cloud main interface
3. Click "Bind Device" to Bind the Device

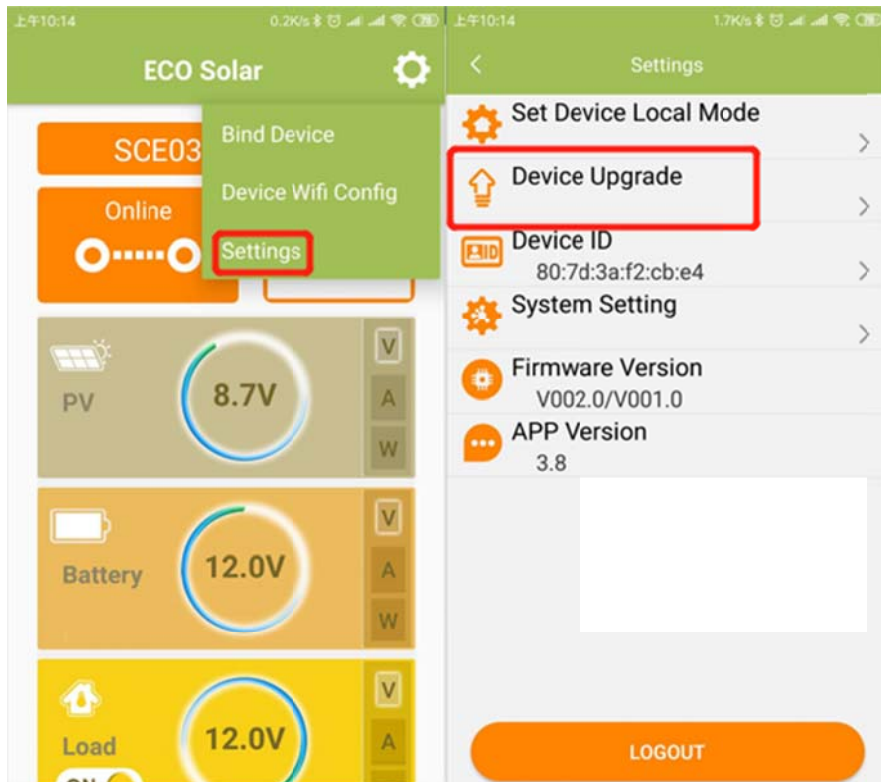

4. Online Connect the Device to a nearby available router through "Device WiFi Config" and wait for about a minute to see if the Device on the main interface becomes online

5. After the Device becomes "online", click "Firmware Update (IOS)/settings-device Upgrade(Android)" to Upgrade automatically. During the Upgrade process, the Device will be restarted

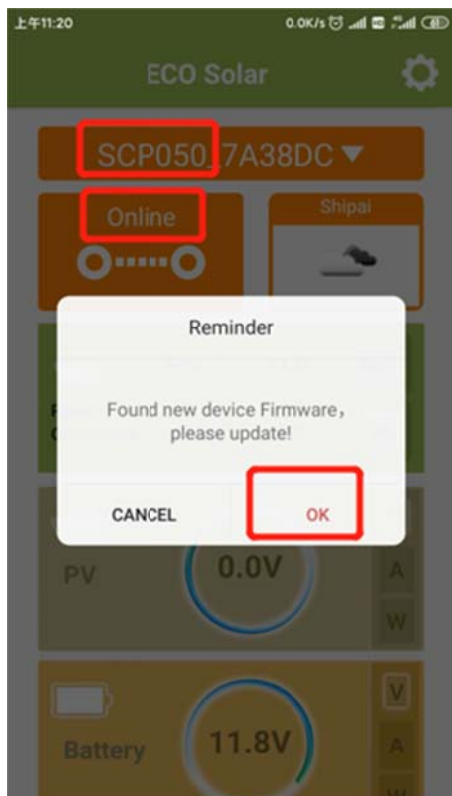

IOS

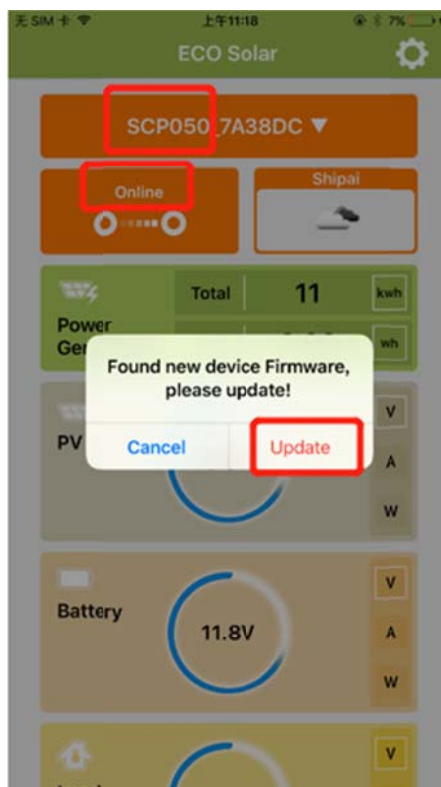

Android

6. If the APP has been updated to the latest version, when "online" is displayed on the device, an upgrade prompt box will pop up (SCP050 device only, and the old version), click to upgrade
