User Manual

QC3112

### Wear it properly

Adjust the size of the wrist according to the adjustment hole; Buckle belt buckle.

The sensor should be close to the skin to avoid moving.

### Charge the bracelet

Please fully charge the smart fitness band before the first use. Connect the charger to the smart fitness band, it will then automatically turn on.

### Install the bracelet app on your phone

Scan the QR code or go to the App Store, to download and install the app

Android/iOS

System Requirements: Android 5.0 or above; iOS9.0 or above; Support for Bluetooth 4.0.

### Device connection

For the first time, you need to connect to the APP for calibration. After the connection is successful, the bracelet will automatically synchronize the time.

- Open the Fitpro app → click to start scanning → click on the device connection
- After the first pairing is successful, it will automatically reconnect in future when disconnected and within range.
- On Android devices please ensure that the app runs in the background and the mobile phone system settings are given all permissions such as running the background and reading the contact information.

### Bracelet function description

- When the device is turned off, touch and hold the function button for more than 3 seconds to turn the device on
- In the Bluetooth address interface of the bracelet, press and hold the 2 second wristswitch to turn off the phone. Short press will exit the shutdown page
- Bracelet reset device This function will clear all data of the bracelet (such as step counting)
- Under the power on state, touch the short press function key to light up the screen

### (Application push)

incoming, call:

In the connected state, if the call alert function is enabled, when the call comes in, the wristband will vibrate and display the name or number of the caller. (You need to give APP read address book permission)

SMS notification:

In the connected state, if the SMS reminder function is enabled, the bracelet will vibrate when there is a text message.

Other reminders:

In the connected state, if this function is enabled, when there is a message such as WeChat, QQ, Facebook, etc., the bracelet will vibrate to remind and display the content received by the app. (You can also view the last three message records in the ring information menu). (You need to give the APP permission to get system' notifications. The wristband can display 20-40 words).

Other functions:

Turn on vibration to set this function. When there is a call, message or other reminder, the bracelet will vibrate. If it is closed, the bracelet will only have a screen reminder without shaking to avoid disturbing.

Tips for Android users:

When using the reminder function, you need to set it to allow "FitPro" to run in the background; it is recommended to add "FitPro" to the rights management and open all permissions.

(Alarm setting)

In the connected state, 8 alarms can be set. After setting, it will be synchronized to the bracelet; offline alarm is supported. After the synchronization is successful, even if the APP is not connected, the bracelet will be reminded according to the set time.

(Looking for a bracelet)

In the connected state, click the "Look for the bracelet" option and the bracelet will vibrate.

(Remote photography)

In the connected state, start the photo from the wristband or the APP to enter the remote camera interface, shake/turn the wrist/touch the bracelet, and automatically take a photo after 3 seconds of counting down. Please allow the APP to access the photo album to save the self-portrait photo.

(Sedentary reminder)

Set whether to enable the sedentary reminder function, you can set the reminder interval, if you sit for a long time in the set time, the bracelet will remind.

(Raise your hand to brighten)

Turn this function on. When the wristband is in the state of the screen, lift your wrist and turn the screen to yourself to light up the screen.

(Do not disturb mode)

Turn on the Do Not Disturb mode. You can set the Do not disturb time period. During the set time period, the bracelet stops receiving notification messages to avoid reminding messages.

(Device reset)

Setting this feature reset will erase all data in the bracelet (such as step counting)
