# SAFETY INSTRUCTION

Please carefully read the following safety instruction so as to avoid personal injuries and prevent the equipment and other connection devices from being damaged.

1. Power sources (note: please use the power supply attached or specified by the manufacturer)

Never operate the equipment by using unspecified power supply.

#### 2. Never push objects of any kind through openings of DVR

Never push objects of any kind through openings of DVR so as to avoid electric shock or other accidents.

3. Do not put the equipment in the dusty field

Do not put the equipment in the dusty field.

4. Do not place the equipment under rain or humid environment

Do not place the equipment under humid environment like basement. If the equipment is accidentally in contact with water, please unplug the power cable and immediately contact your local dealer.

5. Keep the surface of the equipment clean and dry

Use soft damp cloth to clean the outer case of DVR (do not use liquid aerosol cleaners) 6. Do not operate if any problems are found

6. Do not operate if any problems are found

If there are any strange smell or sound from DVR, unplug the power cable and contact the authorized dealer or service center.

#### 7. Do not try to remove the upper cover

Warning: Do not remove the cap of DVR so as to avoid electric shock.

#### 8. Handle with care

If DVR does not work normally because of hitting on the hard object, please contact the authorized dealer for repair or replacement.

# 9. Use standard lithium battery (Note: Use the batteries attached or specified by the manufacturer)

After cutting off the power supply, if the system clock cannot continue to work, please replace the standard 3V lithium battery on the main board.

**Warning:** Turn off DVR before replacing the batteries, or you may be suffered from serious electric shock. Please properly dispose of the used batteries.

#### 10. Put the equipment in a place with good ventilation

The DVR system includes HDD, which produces large amount of heat during operation. As a result, do not block the ventilation openings (on the top, bottom, both sides and the reverse side) for cooling the system during operation. Install or put the equipment in the place with good ventilation.

11. The attached power adapter can only be used for 1 set of DVR. Do not connect more equipment, or DVR may be restarted repeatedly because of insufficient power 12. Prevent the equipment from water dropping or splashing. Do not place objects containing water, such as flower vase, on the equipment

# Chapter 1 Functional Descriptions and Features

Function	Brief Description
Real time monitoring	Support output by monitor, VGA and HDMI, support real-time monitoring by web application manager and mobile phone, and support electronic amplifier, multi-screen sequence and PIP display.
Recording	Support video compression standard of H.264. The video quality, resolution of each channel and video frame rate are adjustable. Support many recording modes, such as start-up recording, timing recording, manual recording, alarm recording, motion detection recording, remote recording, etc.
Record	Support high capacity HDD with SATA port. The records can be stored
storage	immediately in HDD.
Record	Support single-channel or multi-channel search and playback by DVR or
playback	network.
Record	Backup records from DVR to U flash disk, mobile HDD and disk burner; or from
backup	network to HDD.
Alarm	Support alarm management of HDD and video input and the signal input from
setting	external alarm apparatus.
Network	
operation	Support authorized accessing of remote client to ensure the system security.
Mouse	Support USB mouse operation to set system parameters conveniently and
operation	efficiently.
	Support PTZ decoder communicated through RS485. It can expand two kinds
PTZ control	of decoding protocol to realize PTZ and dome camera control. Support PTZ
	preset auto cruise function.

Table 1-1

Features:

- H.264 video compression format, support 960H display resolution;
- G.711 audio compression format;
- Windows style graphic user interface and embedded real-time Linux 2.6 operation system;
- Warm menu prompt;
- Full real-time six functions (preview, recording, playback, backup, network monitoring, and mobile phone monitoring);
  - Support dual-stream network transmission;
  - Support smart phone video monitoring;
  - Support electronic amplifying and channel sequence display;
  - Video packaging time is adjustable;
  - multiple alarm modes;
  - USB2.0 port, support backup, burning, software upgrading, mouse operation, etc;
  - Support infra-red remote control;
  - Support multi-language;
  - Support automatic system maintenance;

# **Chapter 2 Overview of DVR**

## 2.1 Front Panel

**P.S**: DVR is short for Digital Video Recorder Equipment.

# 2.1.1 Front panel of DVR with 8 channels and 1U case (For reference only, goods in kind prevail)

SN	Identification	Functions			
1	PWR	If the "Green" indicator is on, DVR is getting power normally.			
2	HDD	If the "Red" indicator flashes, the hard drive is being read or written to.			
3	<del>در</del> ې	USB port			
4	4 / 44	Move left; Fast backward at various speed			
5	•	Move down			
6	PTZ	Enter into PTZ menu; Confirm operation; Edit			
7	▶ / ▶	Move right; Fast forward at various speed			
8	•	Move up			
9	SEARCH	Record search			
10	MUTE	Mute			
11	CH- / CH+	Single channel selection			
12	ALL	Display all channel together, multi mode			
13	►II	Playback the video or pause the video			
14	•	Start manual recording			
15	MENU/ESC	Enter into the main menu/Return			

## 2.2 Rear Panel

# 2.2.1 Rear panel for DVR with 8 channel and 1U case (For reference only, goods in kind prevail)

SN	Physical Interface	Connection			
1	Audio output	Audio signal output, RCA port			
2	Video input	Connect with CH1-8 (analog) video input device, standard BNC port			
3	Audio input	Connect with CH1-8 audio input signals, RCA port			
4	HDMI port	HDMI high definition port			
5	VGA port	Connect with VGA display devices, such as PC monitor			
6	USB port	Connect with U flash disk, disk burner, and other USB storage devices			
7	RS-485/Sensor/Alarm	RS485/Sensor/Alarm port. Connect by referring to the interface definiti below			
8	Power port	Connect with the power supply DC12V 3A, attached with the machine			
9	Power switch	Turn on /off power supply			
10	LAN: Network port	Connect with LAN, Ethernet and RJ45 port.			

# The following diagrams shows the interface definition of sensor input / alarm output /RS485:

**Alarm input:** Check your purchased alarm device and connect a G (GND) foot to the port marked with "-" and connect the alarm channel to the port marked with "+".

Alarm output: Two ports marked with OUT.

PTZ port: Check your purchased PTZ and connect to the two ports (+ -) marked with RS 485.

# 2.3 Remote Controller (For reference only, goods in kind prevail)

Table 2-3 Operation of remote controller

Table 2-3

Item	Kov titlo	Key function			
	Key title				
1	1-8	Channel select 1-8; Numeric key			
2	9、0	Numeric key			
3	ALL	Multiple display mode			
4	Menu	Enter into Main menu/Exit			
5	Mute	Mute On/off			
6	Submen	Go to submenu			
	u				
7		Up arrow key, volume increase			
8	SEL	Select key/Edit key			
9		Left/Right key; Decrease/increase parameter			
	◀/▶	value of control bar.			
10	▼	Down arrow key, Volume decrease			
11	••	Rewind key			
12	••	Forward key			
13	•	Enter into record search menu / Play key			
14	•	Record key			
15		Stop manual record; stop playing			
16		Pause/Sequence key			

# **Chapter 3 DVR Connection**

# 3.1 HDD Installation

Caution: Please do not take out hard drive when DVR is running! HDD Installation:

(1) Cut power firstly, and then remove screws on both sides and rear panel and open DVR upper cover.(2) Connect HDD data line and power line to the main board. Install the HDD to fix it on the bracket and then connect the HDD power line and data line.

(3) Put the upper cover back carefully

Note: If user requires higher performance HDD, it is strongly recommended to use special hard drive for security and protection.

## **3.2 IP Camera and Monitor Connection**

DVR video output signals are transmitted to VGA monitor or HDMI monitor by VGA or HDMI cable and DVR video can be monitored (Refer to section 1.2 Rear Panel). Refer to Chapter 6 System Connection Diagram.

## **3.3 Power Supply Connection**

Please use attached power adapter to connect DVR. Before power on, make sure the cables on the audio and video I/O ports and network port are well connected. For audio ports, please use microphone and other audio devices together with BNC connecting line to input or output audio signals.

# Chapter 4 DVR Boot up

## 4.1 System Initialization

After connecting the power cable of DVR to wall outlet and pressing the power button, you will

enter into the DVR system initializing screen shown as Picture 4-1.

**Note:** The illustration in the user manual may not be the same as the menu interface in your monitor. All the illustrations are only for users'

Picture 4-1

## 4.2 Startup Wizzard

After DVR startup is completed, the startup wizard will be displayed. If you do not want to make any setting, you may click "Don't show this window next time" to cancel, as shown in Picture 4-2.

Wizard setting menu includes: Homepage, Network setup, Record Schedule and HDD.

1. Homepage and network setup. In network setup page, user may set the network environment of DVR, as shown in Picture 4-3

	Startup Wizard		Net	work Configuration		
		PPPoE	DHCP	• Static

A-CH16	IP CH1	IP CH2	IP CH3	IP CH4
IP CH5	IP CH6	IP CH7	IP CH8	

**Note:** When internal HDD is not connected to DVR, the character "H" will appear on the lower part of the main interface and accompany buzzer alarm. If you want to disable the buzzer alarm, please enter into [Event->Alarm] to disable HDD loss alarm, HDD space insufficiency alarm and set alarm output to "off".

# **Chapter 5 DVR Menu**

## Popup Menu

After finishing system initialization, click right key of mouse on preview interface or slide the mouse to the bottom of screen to enter into Pop-up Menu. Now you could perform parameter setting and operate on Main Menu, Multi-screen, Auto Cruise, Record Search, Sequence, Volume setting and Brightness setting, shown as Picture 5-1.

The options in the pop-up menu may be varied slightly according to different parameter settings and application environment. The options in the menu will be explained in detail in the following chapters.

A-CH1	A-CH2	12/08/2015 15:09:15	A-CH4	A-CH5
A-CH6	A-CH7	A-CH8	A-CH9	A-CH10

interface.

Video Output: Live Output

to cancel the modification, click "Cancel" to exit.

- Sequence Mode: Set sequence mode
- SEQ Time: Sequence time is set 5 seconds by default. User may set it as required
- VGA/HDMI Resolution: For VGA output or HDMI output, the optional resolution include 1024×768, 1280×1024, 1440×900, 1280 ×720, 1920×1080
- Transparency: Adjust menu transparency in the range of 0--128.
- Support Overscan:Support HDMI overscan

Picture 5-8

#### 5. Private Zone

Go to "Main Menu"  $\rightarrow$  "Parameter"  $\rightarrow$  "Display"  $\rightarrow$  "Private Zone" to enter into the interface shown as in Picture 5-9.

Privacy Zone is for setting some invisible parts in the selected channel, as shown in Picture 5-6 and Picture 5-10.

- 1. Select the number of the zone to be set (maximum 4 zones can be set for single channel)
- 2. Click "Setup" to adjust the position of the zone.
- 3. After finish setting, right click the mouse to return to the "**Privacy Zone**" page.
- 4. Click "Save" to save the setting.

### 6. Record Picture 5-9

Picture 5-10

Go to "Main Menu"  $\rightarrow$  "Parameter"  $\rightarrow$  "Record"  $\rightarrow$  "Record" to enter into the interface shown as Picture 5-11.

				Company and

- > Normal: Conventional capture setting
- Motion: Motion detect capture setting
- > Alarm: Alarm capture setting

picture 5-17

#### 13. Network

Go to "Main Menu"  $\rightarrow$  "Parameter"  $\rightarrow$  "Network"  $\rightarrow$  "Network" to enter the interface shown as Picture 5-18.

Select a kind of network connection (PPPOE, DHCP, Static) and set Port, and user may remotely control the monitoring, recording, playback or backup of DVR through network

Take DHCP as an example. In this mode, the router automatically assigns IP address for DVR. After restarting DVR or DHCP server, the IP address obtained by DVR may be different. As a result, user shall check IP address and port number for each remote access of DVR. The operation procedure is as follows:

- 1. Select DHCP, click Save and refresh DVR. Input Client Port and HTTP Port (the two values must not be the same).
- 2. Set obtained IP address of DVR and the mapping port. Refer to section 4.2.4.2.
- 3. Remotely visit DVR by IP address:

http://Public network IP: Web port number (such as 00080)

http:// Intranet IP: Web port number (such as 00080) (Only available in the same LAN)

		7	<b>-</b>	-	٨

🕰 Alam	LIND		*	Default Sa	ve Cancel

Picture 5-18

For PPPoe, Static and DHCP, after setting IP address of DVR, the extranet port shall be mapped on the router before visiting DVR through public network.

Note: Save after setting to make effective. If there are multiple DVRs in a LAN, make sure their MAC addresses are different (Refer to System).

#### 14. E-mail

Go to "Main Menu"  $\rightarrow$  "Parameter"  $\rightarrow$  "Network"  $\rightarrow$  "Email" to enter into the menu interface.

Receive or Send DVR alarm Email and set parameters like Email address, SSL, Email Enable, Interval and Email Schedule. The related parameter setting should be consistent with DVR local setting. Refer to Picture 5-19.

Picture 5-19

#### 15. E-mail Schedule

Select the channel and the date to be set. One week's schedule can be set.

The record schedule of the current channel can be copied to any other channel or all channels.

Note:

- 1. Green stands for Motion: Email will be sent in case of object motion;
- 2. Yellow stands for Alarm: Email will be sent in case of IO alarm;
- 3. Red stands for Exception: Email will be sent in case of exception, e.g. HDD full, HDD damage, Video loss, etc.

Picture 5-20

#### 16. DDNS

Go to "Main Menu"  $\rightarrow$  "Parameter"  $\rightarrow$  "Network"  $\rightarrow$  "DDNS" to enter into the menu interface. User may set DDNS in any one of the above 3 network connection types after applying dynamic domain service. User may remotely access DVR through domain by using browser in the form of http://applied domain: mapped Web port number. When using DDNS domain name to access DVR, user shall confirm that the port can be normally connected to current IP on the public network and the settings for server address/host name/user/password/setting should be consistent with DVR local setting. See Picture 5-21.

#### 19. Motion

Go to "Main Menu"  $\rightarrow$  "Parameter"  $\rightarrow$  "Alarm"  $\rightarrow$  "Motion" to enter into the interface shown as picture 5-26

- > Channel: Enable or disable Motion function.
- Sensitivity: Support 1-8 level, 8 is the highest level.
- Buzzer: When detecting object moving, buzzer makes alarms (disable, 10 seconds, 20 seconds, 40 seconds and 60 seconds).
- Alarm Out: Connect to the alarm switch of the alarm apparatus.
- Show Message: Messages will be displayed on the screen when moving object is detected and alarms are made.
- Send Email: When moving object is detected, send Email to the specified Email address.
- Full Screen: When moving object is detected, messages will be displayed in full screen.
- Latch Time: When moving object is detected, the alarm time can be set as 10 seconds, 20 seconds, 40 seconds and 60 seconds.
- Post Recording: After the alarm finishes, the duration time of the alarm recording can be set as 30 seconds, 1 minute, 2 minutes and 5 minutes.
- Area: Click it to enter into the interface shown as Picture 5-27 to set the motion detection area to be monitored intensively.

A single channel is divided into 15×12 (PAL) or 15×10 (NTSC) configurable grids. The red grids indicate that the motion detection in the area is enabled, white semitransparent ones indicates that the motion detection in the area is disabled. After setting is completed, right click the mouse button to return and click Save to make the parameter setting effective.

**Record Channel:** When object motion is detected, the record channel setting will be activated.

#### 20. Alarm

Go to "Main Menu"  $\rightarrow$  "Alarm"  $\rightarrow$  "Alarm" to enter into the interface shown as Picture 5-28.

	Record Search Alarm In Alarm Type	Device	System	Advanced	Shutdown
Record					
	Alarm Type				
Capture		Normally-Open			
	Latch Time	10 s			
a Network	Buzzer	OFF			
🕰 Alarm	Post Recording Alarm Out	30 s			
Motion	Show Mess	age 📝 Send Emai	I 🦳 Full Screen		
Alam	Record Cha Analog Cha IP Channel	nnels 2 3 4 5	678910111	2 13 14 15 16 2 13 14 15 16	
	Copy IO-1	🔽 To All		Сору	

Picture 5-28

It is the alarm management and setting of the machine. User may set alarms under different status in the interface. Please refer to Table 2-4.

- Alarm In: User may set four groups of alarm input.
- Alarm Type: There are three kinds of status, i.e. Always ON, Always OFF, and OFF. Always ON: When the trigger is on, I/O alarm appears; Always OFF: When the trigger is off, I/O alarm appears; OFF: Do not receive I/O alarm from trigger.
- Buzzer Time: You can set how long the buzzer will sound when motion is detected (off, 10s, 20s, 40s, 60s)
- > Alarm out: Connect the external alarm switch.

> ow Message: Display the alarm messages on the screen when motion alarm is detected.

- > Send Email: Set to send email to specified email when motion alarm is detected.
- Full Screen Alarm: When the motion is detected, the corresponding channel will be switched to the full screen mode.
- Latch time: you can set how long the buzzer will sound when object move is detected by external sensor (10s, 20s, 40s, 60s)
- Post Recording: You can set how long alarm record will last when alarm ends (30s, 1minutes, 2minutes, 5minutes).
- **Record Channel:** The record channel will be activated when the object move is detected.
- Copy: Allow you copy current channel parameters to any other channel (setting of record channel cannot be copied).

Alarm Type	Functions & Descriptions
Video Loss	When DVR fails to receive video signals due to some problems (camera damage, line dropout or damage, power failure), the alarm will appear.
Motion Detection	When IP camera detects object moving, alarm will be activated. Sensitivity is subject to the actual application environment test. <b>Sensitivity</b> is adjusted according to the sensitivity of moving object detection and parameters are modified by combining the <b>area setting</b> .
I/O Status	Communicate with alarm device through I/O port. Alarm signals sent by IR sensor or other devices will be transformed to the system recognized signal and activate relevant channel to record or control the device output.
HDD Status	Alarm will appear when HDD does not work due to damage, power failure, HDD auto-overwrite off and insufficient space.

Table 2-1

### 5.2.2 Record Search

#### 1. General

Go to "Main Menu"  $\rightarrow$  "Record Search"  $\rightarrow$  "Record Search" to enter into the interface shown as Picture 5-29.

Picture 5-30

- Channel: Select the channel you want to search.
- Type: Select the type the playback record. There are two options, i.e. Normal and Alarm.
- Start Time/End Time: Select the specific period of time. The default setting is from 0:00 to 24:00.
- Playback Channel: Click a date and select corresponding channel in Playback Channel. The selected channels shall not be more than 16, as shown in Picture 5-30.
- Playback: Select the desired year and month and click "Search". If there are any records, a yellow corner mark which shows the recording at specific date will appear at the down-right corner of the date sheet. Select the date checkbox and select playback channel and click Playback to enter into the interface.
- Playback interface: You can use the Playback Control bar to operate the Fast Forward (X2, X4, X8 and X16), Rewind (X2, X4, X8 and X16), Slow play (1/2, 1/4 and 1/8 speed), Play, Pause/Frame. You can click or drag the volume control bar to adjust volume. When playback ends, DVR will remain in the playback interface, as shown in Picture 5-25.

#### Time Axis setup, file clip and zoom in/out

1) The DVR supports the processing control bar function when playing back record files (See Picture 5-31 and 5-32)

Picture 5-31

Picture 5-32

Time Axis zoom: Default value is 24hours. Allow user to select 2 hours, 1 hour, 30 minutes or user-defined.

#### ۶ **Detailed Operation:**

Fixed time axis: If you select [ 2h ] option, that means the processing control bar cover two-hour video content. The time range refers to 1 hour before and after the middle point. 2) Record clip and backup function and playback zoom in/out function.

Picture 5-34

- **Clip and backup:** When it is under single channel playback, the [ 100 will appear in ] icon will appear in  $\triangleright$ the Play Control bar shown as Picture 5-28. Click the icon to start video clip function, click the icon again to end the function and pop up the dialog shown as Picture 5-34. Now, you may save the clipped video file.
- **Zoom out:** When it is under single channel playback, the 💽 icon will appear in the Play  $\triangleright$ Control bar. Click the icon to zoom in certain area of the playback screen and right click mouse to return the Playback page (See Picture 5-34)

#### 2. Events

Go to "Main Menu"  $\rightarrow$  "Record Search"  $\rightarrow$  "Events" to enter into the interface shown as Picture 5-35.

In this page, user may search details by date, time, channel and record type. The relevant operations are as follows:

Parameter	Record Se	earch		Dev	rice		Syste	m	Advar	nced	Shutdown
🖗 General	Date	12/0	8/2015	5 30	Time	00:0	00:00	2	3:59:59	All

	, <u> </u>	-115	м	40/	00/000	15	00-00-0	<u>^</u>	00-02-50	67MD	

i Previous page; Click the button to go to previous page when viewing events (except the first page). When viewing the first page, click this button to display the event list in the first page.

: Next page; Click the button to go to next page when viewing events (except the last page). When viewing the last page, click this button to display the event list in the last page.

: Jump; Input the desired record event page in the input box and click arrow button to jump to the input page.

Two types of backup: Quick Backup and Backup

If you want to back up a record in the detailed file list, you may tick the checkbox at the left of the

record (" $\sqrt{}$ "means it has been selected) and click "Backup" to enter into "Select backup type"

(Make sure U disk or other portable storage device are connected), as shown in Picture 5-36.

Parameter	Record Search		Device	System	Advar	iced	Shutdown
General	Date 12/0	8/201	5 📷 Time 00	.00:00	23:59:59	All

Picture 5-41

Go to "Main Menu"  $\rightarrow$  "Record Search"  $\rightarrow$  "picture" to enter into the interface shown as Picture5-42.

In this page, user may search details by date, time, channel and record type. The relevant operations are as follows:

: Previous page; Click the button to go to previous page when viewing events (except the first page). When viewing the first page, click this button to display the event list in the first page.

: Next page; Click the button to go to next page when viewing events (except the last page). When viewing the last page, click this button to display the event list in the last page.

: Jump; Input the desired record event page in the input box and click arrow button to jump to the input page.

Two types of backup: Quick Backup and Backup

Picture 5-42

**EXAMPLE** : Single, Quarter, Nine window display.

## 5.2.3 Device

#### 1. HDD

HDD			1140194300	1	
	No	State	Free/Total	Free Time	Select
			500G/500G	168Hour	

Picture 5-43

	No	State	Free/Total	Free Time	Select
PTZ		ОК	1850G/1863G	43Hour	0
Cloud	2		Notice		0
			OK		

Picture 5-44

When HDD is connected, the system will automatically detect if HDD is normal or not; If HDD need to be formatted, status will be shown as "Not formatted". Select the HDD and format the HDD. If the system detects HDD is normal state, the HDD status will be shown as "Normal". See Picture 5-44

- **No.:** Number of HDD connected to system.
- Status: It shows the current status of HDD. It will be available only when HDD is "Normal".
- Free/Total Space: Remaining or total space of HDD
- Free Time: Remaining time for HDD recording according to currently set "Resolution", "Encoding Rate" and "Frame Rate" of image.
- Auto-overwrite: When set to ENABLE, the NVR will overwrite the oldest files on the hard drive if hard drive space is full. When set to DISABLE, the DVR will stop recording if hard drive space is full. Overwrite time: 1 day, 3 days, 7 days, 14 days, 30 days and 90 days. It means the longest storage time of records in HDD. If the time is over, the records will be deleted. For example, if the time is set as 3 hours and the data in HDD include 12, 13, 14, 15, 16, 17, 18, 19 and 20 o'clock, then data 18, 19 and 20 will be saved and data 12, 13, 14, 15, 16 and 17 will be deleted.
  - Format HDD: Format HDD for the first use.

**Note:** Recording can only be performed when HDD is in "Normal" state.

Go to "Main Menu"  $\rightarrow$  "Device"  $\rightarrow$  "HDD" to enter into the interface shown as Picture 5-43.

Select a PTZ channel and set PTZ protocol (Pelco-D, Pelco-P), Baudrate (1200,

Parameter setting for above channels must be the same as that of PTZ so that PTZ can be controlled. The protocol, baudrate and

2400, 4800, 9600), DataBit(8, 7, 6, 5), StopBit

(1, 2), Parity (None, Odd, Even Mark Space),

Address and Cruise.

PTZ address must be set.

## 5.2.4 PTZ and Cloud Storage

#### 1. PTZ

Go to "Main Menu"  $\rightarrow$  "Device"  $\rightarrow$  "PTZ" to enter into the interface shown as Picture 5-45.

Picture 5-45

#### 2. Cloud Storage

Cloud: Cloud Space (Network HDD). It can upload the DVR periodically captured pictures

and motion detection captured pictures to Dropbox

- 1) Register in Dropbox website, Address: <u>https://www.dropbox.com/</u>
- 2) Configure network to ensure the normal operation of DVR network.
- 3) Configure Cloud: Enable Cloud and set the channel and interval for DVR periodically captured pictures; Enable Motion Detection to get captured pictures for motion detection.
- DriName refers to the name created in the folder of Dropbox and the name can be defined by the user, e.g. CloudDVR000. The folder is to store the DVR periodically captured pictures) (See Picture 5-46).
- 5) Click [Advanced E-mail Setup] to set the Email box. User shall input his Email. (See Picture 5-47)

Picture 5-46

Picture 5-47

- Click [Active Cloud] to activate Cloud and Email will receive the URL related to Cloud User input the registered user name to visit the above website and the following interface will be popped up.
- 7) Click the icon at the upper-left to view the folder (CloudDVR000) made in the 4<sup>th</sup> step.
- 8) Enter the folder to view the DVR captured pictures.

### 5.2.5 System

#### 1. General

Go to "Main Menu"  $\rightarrow$  "System"  $\rightarrow$  "General"  $\rightarrow$  "General" to enter into the interface shown as Picture 5-48

User may set Date, Time, Date Format, Time Format, Language, Video Format, Menu Timeouts and Show

Picture 5-48

#### 2. DST

Go to "Main Menu"  $\rightarrow$  "System"  $\rightarrow$  "General"  $\rightarrow$  "DST" to enter into the interface shown as Picture 5-49

Enter into the interface shown as Picture 5-49 to set DST, Time Offset, Start Time and End Time.

Picture 5-49

time.nist.gov,

#### 3. NTP

Go to "Main Menu"  $\rightarrow$  "System"  $\rightarrow$  "General"  $\rightarrow$  "NTP" to enter into the interface shown as Picture 5-50.

function.

(time.windows.com,

pool.ntp.org).

every start-up.

Picture 5-50

4. Users

Go to "Main Menu"  $\rightarrow$  "System"  $\rightarrow$  "Users" to enter into the User interface shown as Picture 5-51.

Parameter		Device	System	
	No.	User Name	Level	Enable

User Permission User Name user1 Log Search Parameter Maintain Manual Record 💙 Disk Manage 🗹 Remote Login SEQ Control Manual Capture Backup Analog Channels IP Channels Live 🗹 Analog Channels 🚺 IP Channels Playback Analog Channels IP Channels 🔮 PTZ Analog Channels IP Channels Save Clear

Picture 5-52

It supports up to seven users, including one administrator and six users. Click [Edit] button to enter into the [User Edit] interface to input user name and password, as shown in Picture 5-46

NTP service: Enable/Disable NTP

Server Address: Select NTP server

**Time Zone:** Corresponding time zones

**Update Time:** Enable NTP function and

save parameters and click Update Time

**Note:** When NTP function is set to "Enable", system will calibrate the system time at every 00:07:50 and

for various nations or regions.

to calibrate the system time.

User Name consists of 8 characters and password is composed by number 0-9 with max length of 8 numbers

Set user password. Administer is authorized to set user common user's authority, as shown in Picture 5-52

- Log Search: allow you check all the system logs.
- Parameter: allow you set all the parameters.
- Maintain: allow you update version, recover ex-factory value, device reboot and shut down.
- Disk Management: allow you manage and control the HDD and USB drive.
- Remote Login: allow you remotely login DVR.
- SEQ Control: allow you sequence live screens for all the channels.
- Manual Record: allow you manually start/stop record.
- **Backup:** Tick-select the ENABLE " $\sqrt{}$ " option and select channel for backup, the user is allowed to backup the record in the selected channel.
- > Live: Tick-select the ENABLE " $\sqrt{}$ " option and select a channel and the user is allowed to view all the live images in the selected channel.
- Playback: Tick-select the ENABLE "√" option of Playback and the common user is allowed to playback the selected record in the channel.

#### 5. User Edit

User may enable or disable the function or set password (See Picture 5-53)

Go to "Main Menu"  $\rightarrow$  "System"  $\rightarrow$  "Log", as shown in Picture 5-55

Picture 5-55

User may search log information in different period of time. Click "Backup" to save all the log information, as shown in Picture 5-55.

### 5.2.6 Advanced

#### 1. Maintain

Go to "Main Menu"  $\rightarrow$  "Advanced"  $\rightarrow$  "Maintain" to enter into the interface shown as Picture 5-56.

Auto Reboot: Enable the auto maintenance function to reboot system regularly at every day/week/month. When Auto Reboot is enabled, DVR should be in the main interface and no user operation.

Update: Click Update to enter the Device interface and select the updating file in USB to execute.

Picture 5-56

- Load Default: If [Load Default] is selected, you can initialize the system to the ex-factory default. Click "Load Default" and select items to be restored
- > **IPC Upgrade:** Support upgrade connected IPC.
- **Load Settings:** Load parameters in the removable storage device to DVR.
- Save Settings: Save the set parameters of user's DVR to the removable storage device.

**Note**: Do not take out the USB memory or cut off the power during upgrading. When the update is done, system will be automatically restarted. After about 5 minutes, the upgrading will be finished. It is recommended to **load ex-factory default** after upgrading. The auto maintain

function can be effective only when DVR returns back to Preview mode with no any operation within the set auto maintain time.

#### 2. Events

Go to "Main Menu"  $\rightarrow$  "Advance"  $\rightarrow$  "Events" to enter into the interface shown as Picture 5-57.

			anala	_

Picture 5-58

## 5.3 Menu Lock

In consideration of system safety, user may click the icon in the toolbar when he leaves away from DVR and the system interface will be locked. User has to input Device ID, User Name and Password on the login interface to unlock (**Default: User Name: admin, Password: blank**). The login interface is as shown in Picture 5-59.

		Login		
Device ID	000000		I	( 000000 )
User				
Password				
	Login		Cancel	

**Note:** Administrator has all authorization of menu operation and users have limitations for authorization and have to get authorization from administrator.

## 5.4 Split Mode

There are many display modes in video channel, including single channel display, SEQ display and split mode.

## 5.5 Record Search

Click contained on the toolbar to enter into the Record Search interface to search and playback. Refer to former section for specific operating method.

## 5.6 Mute

Click icon on the toolbar or Mute button on the panel or remote controller to control the mute of NVR.

## 5.7 Start Sequence

After set channel sequence time, click Start Sequence icon and the toolbar to start sequence.

# **Chapter 6 Web Application Manager**

## 6.1 ActiveX control download and installation

Open your web browser and input the IP address and Web port number of DVR, such as: <u>http://172.18.6.202:8080/</u>. If your computer is connected to internet, it will download and install "ActiveX" plug-in automatically. If you use Windows Vista or Windows 7 and unable to backup or record during remote operation, please check the user authorization.

WIN7:

WIN7-1

WIN7-2

**Note:** If the ActiveX control is not downloaded successfully, please check if your browser's safety level or firewall setting is set too high. Please open IE browser  $\rightarrow$  [Menu Bar]Tools  $\rightarrow$  Internet options  $\rightarrow$  Security  $\rightarrow$  Internet  $\rightarrow$  Custom Level  $\rightarrow$  Enable the options (Refer to the Picture 6-1-1 and Picture 6-1-2).

If the web application runs for the first time, please wait for about one minute to finish downloading.

If you want to use the undated ActiveX control at a computer which you have already logged in before, please delete the original control and click [Start  $\rightarrow$  Run] and then input the command characters: "regsvr32/u HiDvrOcx.ocx". Press OK. When you log in at the next time, new ActiveX control will be automatically downloaded. Please wait.

### 6.3.1 Menu Bar

Menu Bar: Live, Replay, Configuration, Local Setting and Logout.

#### 1. Live Display

Log in the Web Application Manager, system will be defaulted to enter into <Live> interface shown as Picture 6-3. You can click [Play] button to Open/close live images, on-spot record, capture, and many live display modes.

Buttons on a single live interface:

Volume switch

Record switch: the remote record switch of client. Record will be automatically saved to a specified position on PC after the function is enabled.

Snapshot: Capture the selected live image and save it to a specified position on PC. The image is saved as \*.bmp format.

: Open or close the images on Live window.

Or **click the right key of mouse on each <Live> window** to pop up channel operation menu as shown in Picture 6-4

Show bit rate Picture 6-4

Show bit rate: Tick Show Bit rate to show IPC bit rate in current window.

Switch display mode in channel window

Open all the Live channels.

Close all the Live channels

Display previous group of channels

Display next group of channels

Click to maximize the current window to full screen. Right click to popup menu option and select Exit Full Screen.

#### 2. Video Control

Picture 6-5

## 6.3.2 Playback

Playback to enter into Playback interface to remotely view the records in DVR Click

Playback Remote Setting Local Settings Live Logout 12 2015 hade Winde ~ Type All CH01 IP CH05 ~ CH02 IP CH06 Playback Window03 Playback Wind 200:00:00 00:00:00 CH03 CH04 IP CH08 IP CH09 CH06 IP CH10 CH07 IP CH11 IP CH14 IP CH15 IP CH18 CH15 IP CH19 CH16 IP CH20 a

HDD, as shown in Picture 6-6.

Picture 6-6

It supports 1 to 4 channel record playback.

#### 1. Record Search

#### Record playback procedure

Firstly, select the date you want to check and tick 1 to 4 channels. Any record files in current channel at current date will be displayed in the status bar of the interface. (See Picture 6-7)

Picture 6-7

Secondly, select record type (Normal record, Alarm record and All) and channels, and then click

"Search", and time axis panel will display specific time quantum, as shown in Picture 6-8. On the time axis, red part stands for alarm record, yellow stands for normal record and original part stands for no record during this period.

Picture 6-8

Before playback, choose to enable playback 4 channels synchronously. If you tick-select "Synchronous playback", that means the selected channel will playback synchronously; otherwise, you could separately control the channels playback.

Thirdly, start playback

Click click click click to start record playback. When mouse curse is moving on the time axis, the time point of current position will be displayed on the time axis screen. Click to locate the record. Click the

icon or to zoom in/out the time bar display ratio, as shown in Picture 6-8.

#### 2. Playback Control

Playback control bar, as shown in picture 6-9.

Detailed brief description is shown as below list

Key	Description	Кеу	Description
	Play		Enable the volume switch
=	Pause		Volume adjustment bar
	Stop	1/8x 1/4x 1/2x 1 2x 4x 8x	Slow playing 1/2,1/4, 1/8, Fast playing 1/2/4/8
	By frame	$\boxtimes$	Stop playing all the files
Ê	Record Clip		Single channel mode
C	Snap		Quad mode
<b>±</b>	Download	Ш	Full Screen
	Open all the playback channels		Stop playing all the playback

#### **Record file clip**

After opening playback, click icon to clip the selected file; and click again to stop the clip function. Then playback clip is successfully done. Record clip file will be saved as \*.264 format.

#### **Snapshot function**

Move the mouse curse to the channel you want to capture, and click [

live images remotely. After capturing the images successfully, a path prompt box will be popped up, as shown in Picture 6-10.

Path to Save ScreenShots	×
D:\\Device\\Capture\\Record\\2015 \\221.4.221.197\\CH1\\221.4.221.197 20151216-103246.bmp	
Folder Preview	

Picture 6-10

The captured file will be saved as .bmp format.

#### **Record file download**

Click download icon "

search conditions of channels, as shown in picture 6-11.

	Index	Start time	End time	State	F
	1	2014-07-09 10:59:55	2014-07-09 11:01:05	Not download	1

## 6.3.8 Advanced

Click Advance to unfold its sub-options: Firmware Update, Load default, Events and Maintain. **1. Firmware Update** 

User may remotely update DVR system, as shown in Picture 6-32.

Picture 6-32

Updating procedure: Firstly, select the update file path. The file format is .sw. Please refer to Picture 6-33.

Picture 6-33

Secondly, click "Start" to start updating. The updating progress can be seen on the screen, **2. Load Default** 

User may remotely restore default parameters of DVR, with same setting method as that of DVR, shown as Picture 6-34.

Picture 6-34

#### 3. Events

User may configure Event Type, Buzzer, Send Email, Show Message and other parameters shown as Picture 6-35. Detailed setting should be consistent with DVR local setting.

### 6.3.10 Logout

Click Logout to log out and return to the login interface.

# **Chapter 7 Appendix**

## 7.1 Troubleshooting

- Q: What can I do if the system does not detect the HDD?
   A: Check if the power supply system is properly connected and data cord and power cables are securely connected, and if something wrong with the HDD interface. Or you may check if your HDD is supported by referring to the specifications or descriptions.
- Q: I have changed the password but forget the new password, how can I access the system? A: If you forget system password, please consult with our technical personnel. We strongly suggest user to set password easy to be remembered and relatively safe. If you have safety requirement, please do not set very simply password, such as 000000.
- Q: We see abnormal video signal or even no video signal by connecting the DVR and camera together. Power supply for both devices is OK. What is wrong?
   A: Check network cable at DVR side to see if the cable is firmly connected and if it is worn out and needs to be replaced, or to check if NTSC or PAL is selected consistently.
- 4. Q: How to prevent DVR from being influenced by heat?A: The DVR needs to dissipate heat while it is running. Please place the DVR in a place with good air circulation and away from heat sources to ensure stability and life of the DVR.
- 5. Q: The remote controller of DVR doesn't work while the monitor screen is OK and panel keys are functional. Why?

A: Operate again by aiming the remote controller at the IR receiver on front panel. If it still doesn't work, please check if the batteries in the remote controller are dying. If not, check if the remote controller is broken.

- Q: I want to take out HDD from my PC and install it in DVR. Can it work?
   A: All HDDs supported by the system can be used. But remember, once DVR runs, the data on your HDD will be lost.
- 7. Q: Can I playback while recording?A: Yes. The system supports the function of playing while recording.
- Q: Can I clear some records on HDD of DVR?
   A: In consideration of the file security, you may not clear part of records. If you want to remove all the records, you can format HDD.
- Q: Why can't I log in DVR client?
   A: Please check if the network connection settings are correct and RJ-45 port is with good contact. And check if your account and password are correctly input.
- 10. Q: Why can't I find any records during playback?A: Please check if the data line connection for HDD is OK and system time is properly adjusted. Try a few times and restart. If it still doesn't work, check if the HDD is broken.
- 11. Q: Why DVR cannot control PTZ?
  - A: Please check if:
    - 1. PTZ in the front side is malfunctioned.
    - 2. Setting, connection and installation of PTZ decoder are not correct.
    - 3. PTZ setting of DVR is not correct.
    - 4. Protocol of PTZ decoder does not match that of DVR.
    - 5. Address of PTZ decoder does not match that of DVR.
    - If many decoders are connected, the farthest side of AB line of PTZ decoder should be added 120Ω resistance to realize reflection suppression and impedance matching. Otherwise, PTZ control will be unstable.

- 12. Q: Why doesn't dynamic detection work?A: Please check if the motion detection time and motion detection regional setting are correct and if the sensitivity is set too low.
- 13. Q: Why doesn't alarm work?A: Please check if the alarm setting, alarm connection and alarm input signals are correct.
- Q: Why does buzzer keep alarming?
   A: Please check the alarm setting, check if motion detection function is enabled and object motion is detected all the time and if I/O alarm is set as Always Off. Besides, refer to corresponding HDD alarm setting.
- 15. Q: Why can't I stop recording by pressing "STOP" button or click "Stop Recording" in context menu?

A: Pressing Stop or Stop Recording can only stop manual record. If you want to stop Scheduled recording in certain time quantum, please change the setting to No Record. To stop Startup recording, please change record mode to scheduled recording or manual recording. Then you may stop recording by the prescribed methods. And another way of stopping recording is to set channel as off status in record setting.

## 7.2 Usage Maintenance

- 1. To shut down DVR, please firstly shut down the system and then turn off the power. Do not turn off the power directly or HDD data will be lost or damaged.
- 2. Please keep DVR away from heat sources or places.
- 3. Clean the internal dust regularly. Make sure the good ventilation of DVR so as to ensure the good heat dissipation.
- 4. Please do not hot plugging audio and video cables, or cables connected to ports like RS-232 or RS-485. Otherwise the ports will be damaged.
- 5. Please check the HDD cable and data cable regularly to see if they are ageing.
- 6. Please prevent the audio and video signals of DVR from being intervened by other electronic devices, and prevent the HDD from being damaged by static electricity and induced voltage.

If the network cable is frequently plugged, it is suggested to replace connecting line regularly, or the input signal may be unstable.

7. This is A class product. it maybe bring wireless interference in life. Under this situation, it need user to make measures.
