Common Problems

Problem	Solution
When you use the main display to play a movie, and drag it to another display to extend your playing screen, it does not work.	Change another player software, such as KMPlayer.
The character font looks blur and strange.	First you have to know the screen resolution of your display, then set the same of the product.
The pictures are incomplete on your display.	Please try to use the display that has the same screen resolution of your main display.
